

LED Conversion Kits

Part Number: 6013

Application: 1949-52 Pontiac

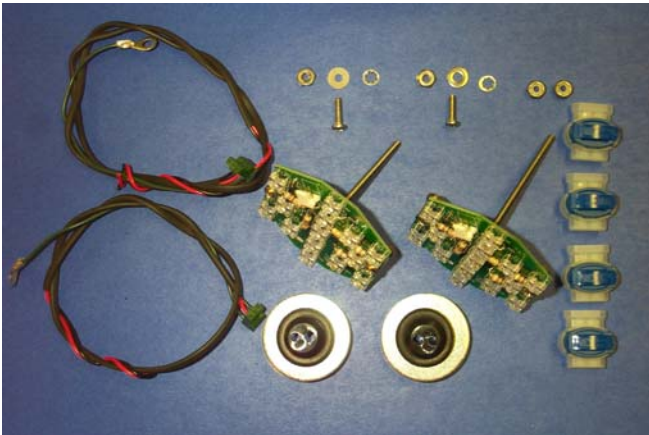

Product Details: Converts the tail, stop, and turn signals into very bright and visible LEDs. LEDs feature a wide viewing angle of 100 degrees as well as cool operation and long life. This kit is designed to bolt into a 1949-52 Pontiac taillight housing with the provided stainless steel brackets. Stock lenses are reused for a factory appearance when the lights are off. A true bolt-in for stock Pontiac taillight housings or reproduction units.

Installation time: About 30 minutes

LEDs: 14 per side, high intensity LEDs, 100 degree viewing angle, rugged four pin design.

Kit Contents: (2) LED arrays, (4) solderless connectors, (2) LED to car electrical harness, installation instructions.
